## Open Recalls

Recall #: N150240 | POWER LIFTGATE PROP ROD RECOVERY Recall Date: 2015 Nov 10

### Recall Description

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2008-2012 model year Buick Enclave, 2009-2012 model year Chevrolet Traverse, 2007-2012 model year GMC Acadia, and 2007-2010 model year Saturn Outlook vehicles with the power liftgate option. These vehicles have a condition in which the gas struts that hold the liftgate up may prematurely wear. These vehicles have a Prop Rod Recovery system intended to accomplish a controlled, slow return of the liftgate to the closed position if the liftgate's gas struts are no longer capable of supporting the weight of the liftgate. However, in these vehicles, the liftgate's Prop Rod Recovery system software may be unable to detect/stop a liftgate with prematurely worn gas struts from falling too quickly after the liftgate is opened.

### Remedy

Dealers will reflash the power liftgate actuator motor ECU a new software calibration intended to mitigate the condition, free of charge. Additionally, dealers applying the reflash remedy to a vehicle will verify power liftgate operation following the reflash to determine whether its liftgate gas struts need to be replaced as well.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact GMC or visit GM's website. (<https://my.gm.ca/gm/en/recalls>)
